# INSIGHT Q&A

## WITH SEWING PATTERNS BY MRS H

Samantha Hussey (or Mrs H to her fans) is an independent bag sewing pattern designer based in the beautiful Welsh Valleys.

Mrs H designs modern bag sewing patterns for all skill levels, aiming to make tricky styles accessible and to help beginners use pretty hardware!

### Q When did you first start designing bag sewing patterns?

I started my business in 2011, but it wasn't until 2014 that I began building my brand. I love designing sewing patterns that help bagmakers to develop new skills, and use beautiful hardware! I love seeing patterns I've written becoming bags I never could have envisaged, and love seeing bagmakers earning a living from selling the bags they've made using my patterns. As well as designing bag sewing patterns, I run sewing retreats in the beautiful valleys of South Wales, and co-run the Bag of the Month Club.

### Q Who are your patterns suitable for?

My sewing patterns are designed for a variety of skill levels, and many retailers also teach classes or run workshops with them. Bag making is growing rapidly and workshops are an excellent way to capitalise on the trend.

### Q What's your favourite bag sewing pattern?

Oh, that's a tough one! I usually find myself loving whatever pattern I'm currently working on. Our customers' favourites are the Companion Carpet Bag, the Dainty Daytripper and the Jangles Anchor Bag. It helps to see so many gorgeous versions being made in the sewing groups on Facebook, it just makes me fall in love with my patterns even more!

### Q Why should visitors come to your stand?

We offer a 50% discount for wholesale purchases of our paper sewing patterns. Visit us at Stand A21 to find out more

### Q What's new for 2020 for Sewing Patterns by Mrs H?

We've recently released the Crossbody Bag and the Loopy Lou bag sewing patterns. Both were originally designed for the Bag Retreat, but are now available on general release.

### Where can people find out more about Sewing Patterns by Mrs H?

Come and visit me and my team at Stand A21! You can also find me on Facebook and Instagram as @sewingpatternsbymrsh, visit my website at [www.mrs-h.com](http://www.mrs-h.com), or send me an email at [mrsh@mrs-h.com](mailto:mrsh@mrs-h.com)

READ MORE ABOUT  
VLIESELINE® & SUSTAINABILITY

## RECYCLING MAKES *all the difference*

The consumption of plastic is as high as ever before. Millions of plastic bottles, bags and packages pollute our environment. Vlieseline® has set itself the goal to counteract this pollution and to take appropriate action.

We already offer products made of 100% recycled polyester and/or mixtures thereof.

### The advantages of recycled polyester:

1. Does not end up in one of our dumps or – even worse – in our oceans.
2. Needs considerably fewer resources for its production.

Freudenberg Performance Materials recycles around 7 million PET bottles per day and around 2.5 billion PET bottles per year in its European plants. The length of these bottles taken together would reach 15 times around the earth.

With interested footfall reaching the thousands, showcasing your products properly can really boost your profits and with social media sharing on the rise, an eye-catching stand can do its bit to increase your brand awareness outside of the exhibition hall too! However, it’s not always easy to make your booth stand out among a sea of competitors.

Join Liz and Nicola as they walk you through tips and pointers on how to dress exhibition stands and create eye-catching displays, whatever space or products you have to hand. Having worked on exhibitions focused on everything from craft and fabrics to eyewear, they understand the complexities of stand display, and can guide you through the simple steps you need to make your stand the one that everyone remembers.

TEXTILE STANDARDS AND OTHER  
INITIATIVES – HOW WE ARE TRYING TO  
SAVE OUR PLANET: THE STORY SO FAR

Jane Makower, Former MD,  
Jane Makower Fabrics

With climate change being a hot global topic at present, more and more customers are starting to ask what is being done in the fashion and textile industry to protect the planet. As retailers we want to be better informed. Jane Makower says, “a large number of textile initiatives exist and many of the big players on the high street have signed up to them. But not many of us know what these initiatives and standards aim to do or how effective they are.”

This talk is an introduction to textile standards and initiatives, who developed them and why, so we can have a more educated conversation with our customers. It includes recent research that measures how different stages of the fashion supply chain impact the environment. The research shows that consumers who make things or enable others to do so can be well placed to reduce our carbon footprint.
